**World Wide Notary to Demonstrate at Largest Capitol Hill Tech Policy Exhibition
Demo to Illustrate Importance of eSignatures and eNotarizations on Compelling
Policy Issues**

Vernon, TX, January 9, 2009 – World Wide Notary (WWN) is pleased to announce it will demonstrate its eSignature and eNotarization technology, DigaSign, at the 12th Annual Congressional Internet Caucus Advisory Committee Kickoff Technology Policy Exhibition, on January 13, 2009. The Tech Policy Exhibition, now the largest and longest running event on Capitol Hill, will highlight some of the key pointed issues that will continue to impact policy-making in the 111th Congress. Hands-on demonstrations of the latest technologies in energy efficiency, authentication and verification, digital content, parental controls, disaster response, consumer electronics and more, will help illuminate these debates and possible solutions.

WWN will demonstrate DigaSign, an Internet service to securely apply electronic signatures and professional seals (notary, geologist, engineer etc.) to electronic documents. DigaSign takes Window's based documents, PDF or TIFF files and posts them to WWN's secure servers for processing.

WWN will simulate the eSigning and eNotarization of mortgage documents by multiple people from multiple locations. Also utilized will be DigaSign's disconnected signing feature that allows documents to be securely downloaded to a laptop and signed in a remote location and synchronized back to the WWN servers once Internet access is available. "With the current mortgage crisis stimulating the need for large volumes of loan modifications and refinancing, DigaSign can provide electronic means to process these loans in minutes instead of day saving time and money to the homeowner as well as the lender", said Sheila Hemphill, Vice President of Sales of WWN.

"With DigaSign's support utility, we will demonstrate the complete control and audit over a user's access to the system that makes DigaSign perfect for licensure governing bodies to grant or limit access to commissioned users (notaries, engineers etc.)", said Jason Streit, President of WWN.

Internet Caucus Co-Chair Senator Patrick Leahy will preview the technology issues that will be drivers for Internet innovation and policymaking decisions. The goal of this annual tech exhibition is to bring cutting-edge technology demonstrations to Capitol Hill that illustrate the power and flexibility of the Internet as medium for communications, commerce, and democracy. This event will be widely attended by Internet industry and non-profit representatives, leading academics, and government policy staff.

"We have numerous applications where DigaSign can be beneficial to federal, state and local governments. We are extremely flattered to be 1 of only 30 companies who were selected to demonstrate at this prestigious event," said Bob Rice, CEO of WWN.

The Congressional Internet Caucus Advisory Committee is a diverse group of public interest, non-profit, and industry groups working to educate Congress and the public about important Internet-related policy issues.

About World Wide Notary:

World Wide Notary, a privately held Texas Corporation, is a leading provider of electronic signature and electronic professional seal technology. World Wide Notary's technology can be utilized by any industry needing multiple signatures and/or professional seal approvals from multiple locations. Professional seals could be for example notaries, architects, surveyors, geologists and government officials. Pioneering electronic signatures, as early as 1996, World Wide Notary's management team has years of experience in the Internet technology industry working with stringent federal mandates, such as HIPAA, E-SIGN and state UETA regulations, regarding security and the use of electronic and digital signatures.
